

Dragonaut

Experience the might of the Dragonaut with these simple yet powerful instructions. Embark on a quest to unveil the secrets of the heaviest high-gain preamp pedal that transcends boundaries, morphing into a distortion/fuzz masterpiece. Prepare to be amazed as the preamp topology reveals itself through two LM386 amplifier ICs, offering unparalleled sonic possibilities.

Controls that put the power in your hands:

- **LEVEL:** Take command of the overall effect volume and unleash a wall of sound that dominates the airwaves.
- **GAIN:** Embrace the essence of awe-inspiring tone as you manipulate this control to unlock the full potential of the Dragonaut.
- **TONE:** Sculpt the brightness of your signal, from blistering highs to brooding depths, creating a sonic landscape that reflects your vision.
- **MASS:** Dive into the heart of the midrange, controlling its depth and presence with absolute precision.
- **EQ ON/OFF:** In the downward position, transcend the limitations of the tone stack and let your sound roar in its purest form.
- **Internal Trimpot:** Fine-tune the volume of the second stage amplifier, customizing the level of raw power lurking within.
- **BYPASS Stomp Switch:** With a simple stomp, bring the Dragonaut to life or let it rest in silence, granting you control over its unleashed fury.
- **STACK Stomp Switch:** Activate or disengage the second amplifier, opening doors to a new realm of sonic exploration and expression.

Harness the true might of the Dragonaut as you navigate its controls with confidence and discover a universe of sonic potential at your fingertips. Let the Dragonaut guide you on a journey to sonic transcendence.

SWITCHING

This pedal features 3PDT true mechanical bypass switching.

POWER REQUIREMENTS

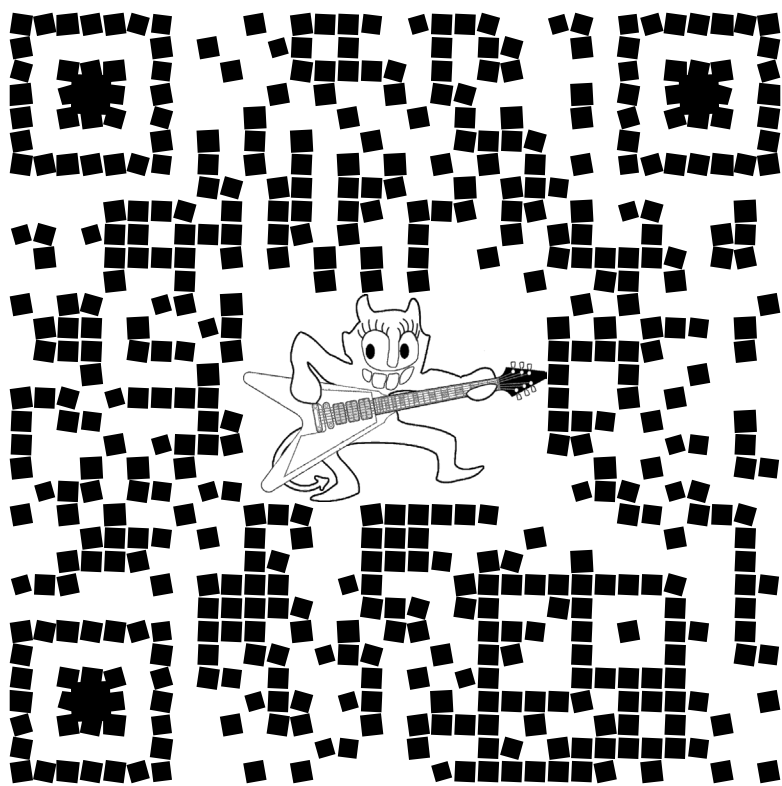

This machine takes a standard 9 volt DC power supply with a 2.1mm negative center barrel. We always recommend pedal-specific, transformer-isolated wall-wart power supplies or multiple isolated-output supplies. Pedals will make extra noise if there is ripple or unclean power. Switching-type power supplies, daisy chains and nonpedal specific power supplies do not filter dirty power as well and let through unwanted noise. **DO NOT RUN AT HIGHER VOLTAGES!**

Current draw: 18ma

WARRANTY

This machine has a limited lifetime warranty. If it breaks, we will fix it. Should you encounter any issues, please email info@demonicmachines.com
