

# Treble Boost

Introducing the 87 Series Treble Boost, a budget-friendly Range-master-style treble booster that delivers searing lead tones! Whether you're looking to unleash a monstrous sound, add definition to your fuzz, or push your amplifier into delightful breakup, this pedal has got you covered. Prepare to be impressed!

## Controls:

**Boost Level Knob:** This knob allows you to adjust the level of the boost. To increase the boost level, simply turn it clockwise. Experiment with different settings to find your desired tone.

# SWITCHING

This pedal features DPDT relay true bypass.

## POWER REQUIREMENTS

This machine takes a standard 9 volt DC power supply with a 2.1mm negative center barrel. We always recommend pedal-specific, transformer-isolated wall-wart power supplies or multiple isolated-output supplies. Pedals will make extra noise if there is ripple or unclean power. Switching-type power supplies, daisy chains and nonpedal specific power supplies do not filter dirty power as well and let through unwanted noise. **DO NOT RUN AT HIGHER VOLTAGES!**

Current draw: ~54mA

## WARRANTY

This machine has a limited lifetime warranty. If it breaks, we will fix it. Should you encounter any issues, please email [info@demonicmachines.com](mailto:info@demonicmachines.com)
