

FUKT FUZZ

MANUAL

Exciting news! The long-awaited return of the Fukt Fuzz is finally here. As one of our very first circuit creations, the Fukt Fuzz has undergone a revival, and we're thrilled to introduce you to its updated version, now equipped with a versatile blend knob. Prepare to embark on a sonic journey as you dive into a world of synth-like textures and unearthly noisescapes with this uniquely intense fuzz pedal.

Let's dive into the controls and unleash the full potential of the Fukt Fuzz:

- **SUB:** This control governs the level of the monophonic sub-octave. Adjust it to add a deep, rumbling foundation to your sound. Experiment with different settings to find the perfect amount of sub-octave presence that complements your playing style.
- **FUZZ:** The FUZZ control allows you to determine the intensity of the square-wave fuzz. Crank it up for a blistering wall of distortion or dial it back for a subtler, grittier texture. Find the sweet spot that resonates with your musical vision and explore the range of fuzz possibilities.
- **BLEND:** The BLEND knob acts as your gateway to shaping the balance between the sub-octave and square-wave fuzz voices. With this control, you can create unique blends of tones, from a dominant sub-octave presence to a harmonious blend of both voices. Explore this feature to craft your signature sound and unlock new sonic dimensions.
- **BIAS:** The BIAS control is where the magic happens. It enables you to adjust the biasing of the fuzz, taking you from spilling, gated fuzz to a hella fuzzsain extravaganza. Experiment with the BIAS setting to unleash a wide range of tonal expressions, from aggressive and punchy to sustained and saturated.

Discover the true power of the Fukt Fuzz as you tweak these controls to sculpt your ideal sound. Immerse yourself in a sonic realm that defies convention, where unconventional noise becomes a symphony of chaos and creativity. Brace yourself for a truly unique and transformative playing experience.

Please note that while the Fukt Fuzz may be described as a "piece of shit fuzz" due to its unpredictable and raw nature, it is precisely these qualities that make it a prized tool for musicians seeking unconventional sounds and unfiltered expression.

Unleash your creativity, explore new sonic territories, and embrace the madness that is the Fukt Fuzz. Let this pedal become your accomplice in crafting groundbreaking music that pushes boundaries and challenges the status quo.

SWITCHING

This pedal features 3PDT true bypass switching.

POWER REQUIREMENTS

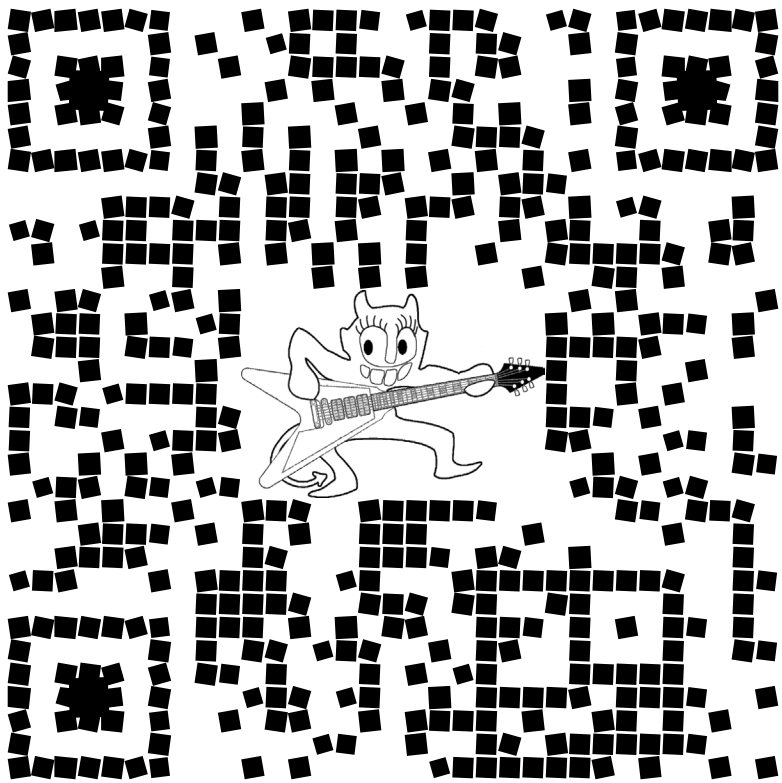

This machine takes a standard 9 volt DC power supply with a 2.1mm negative center barrel. We always recommend pedal-specific, transformer-isolated wall-wart power supplies or multiple isolated-output supplies. Pedals will make extra noise if there is ripple or unclean power. Switching-type power supplies, daisy chains and nonpedal specific power supplies do not filter dirty power as well and let through unwanted noise. DO NOT RUN AT HIGHER VOLTAGES!

Current draw: ~10mA

WARRANTY

This machine has a limited lifetime warranty. If it breaks, we will fix it. Should you encounter any issues, please email info@demonicmachines.com
